

# BUILD YOUR DREAM WEBSITE

WEBSITE . HOSTING . DOMAINS

Simvoly is new and unique platform, elevating website building to another level. It is easy, yet powerful way to build the project you always wanted. Make a website, blog, showcase your work or increase the online presence of your business. Simvoly is the best place to do it without any programming skills!

Our goal is to make the web prettier and help you create elegant websites with our intuitive drag and drop builder, without spending too much of your most valuable resource - time.

Simvoly contains a variety of beautifully tailored templates that can fit any business and idea you may have.

We know what a successful project needs and bring it to you in the most suitable way. The platform is designed to offer the most convenient experience for everyone.

Our simple and elegant workflow will help you build your website in minutes and not waste your time on minor tasks.

**SIMVOLY**

# Getting Started

Your building experience starts with selecting one of the beautiful templates and entering your website name. You are all set to build the website you've always dreamed of.

## The Interface

This is the most unique and appealing part of the system - the way you tailor your website. With the minimalistic yet powerful interface you can move, re-size and style everything without the complexity of the existing builders. Our convenient drag and drop builder enables you to add and arrange forms, text sections, icons, images, sliders, videos and many more with a single click.

Navigate through pages, create new ones, go through some of the unique website settings that many of the competitors' builders don't have. The interface is stripped off of any unneeded and cluttering buttons, aiming at simplicity, allowing you to craft your website without any distractions.

Make multiple websites with different designs and compare them to select the best fit for your needs. All your websites start with a 14-day trial to cover your tests.

All website are responsive and look great on mobile devices.

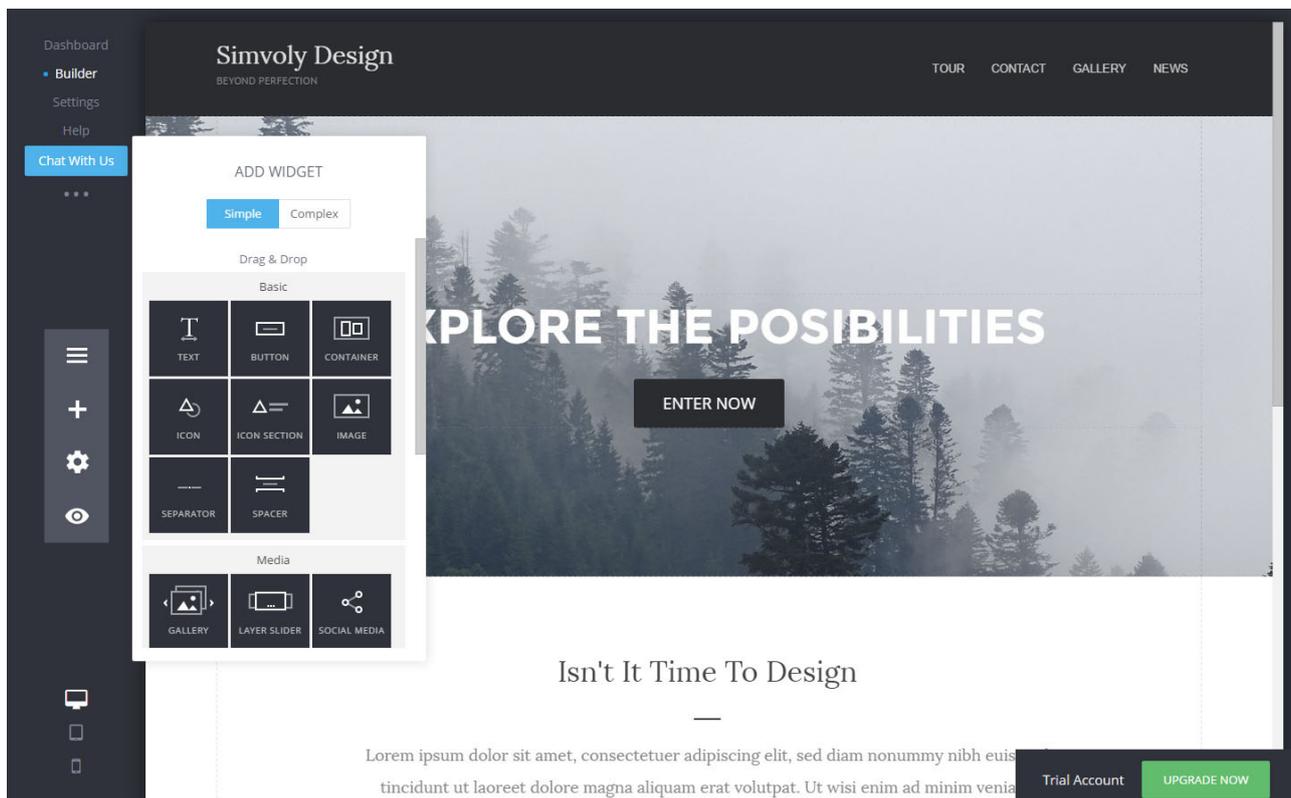

# The Widgets

All components are organized in widgets - basic and complex.

Basic widgets are small, simple blocks, ready to be included on your page.

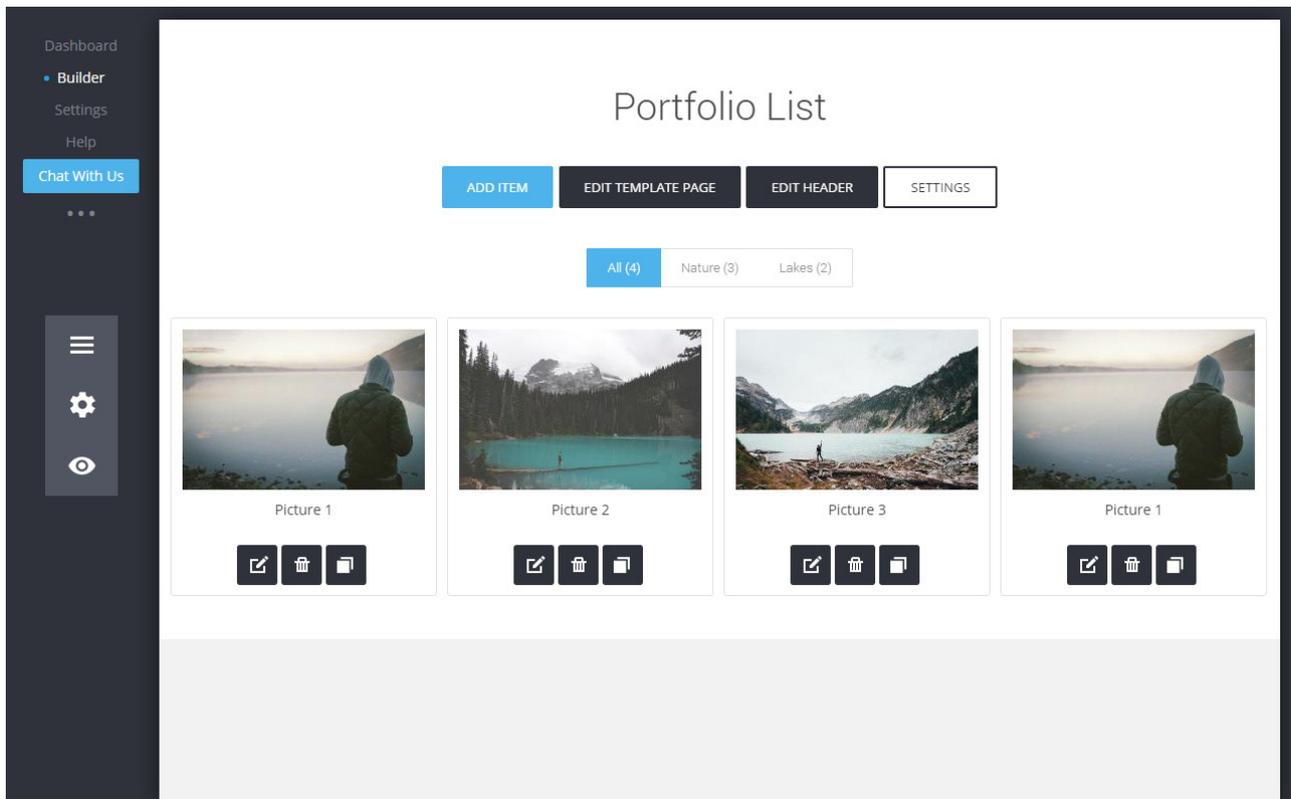

Complex widgets are pre-made containers with basic widgets, arranged and styled by our designers to bring complete sections to your website, leaving your focus on the content.

We made them so you don't have to.

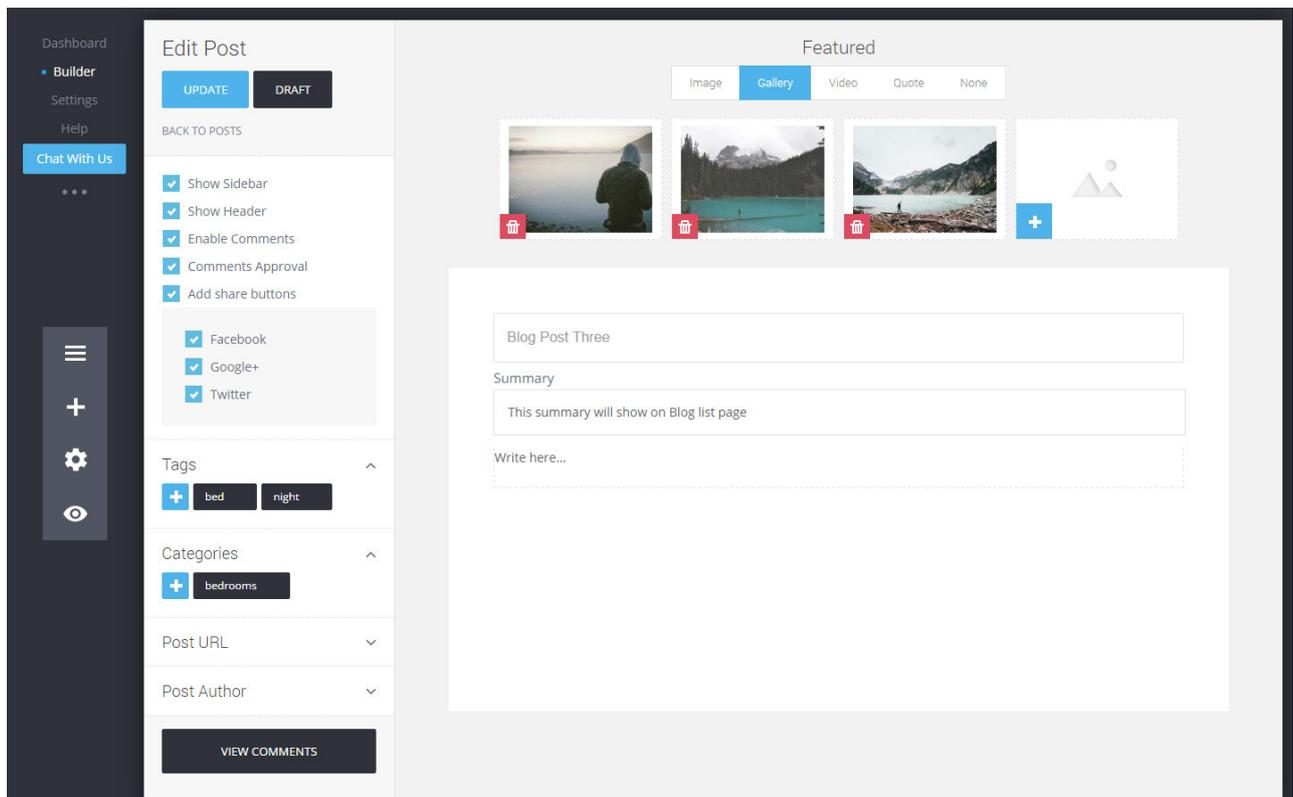

# Portfolios

Simvolly knows how important it is to show your work in the best possible way. With the portfolio functionality you can organize your work and show it to the world in different layouts and animations. Create dedicated pages for each one of your portfolio items to show detailed information in no time.

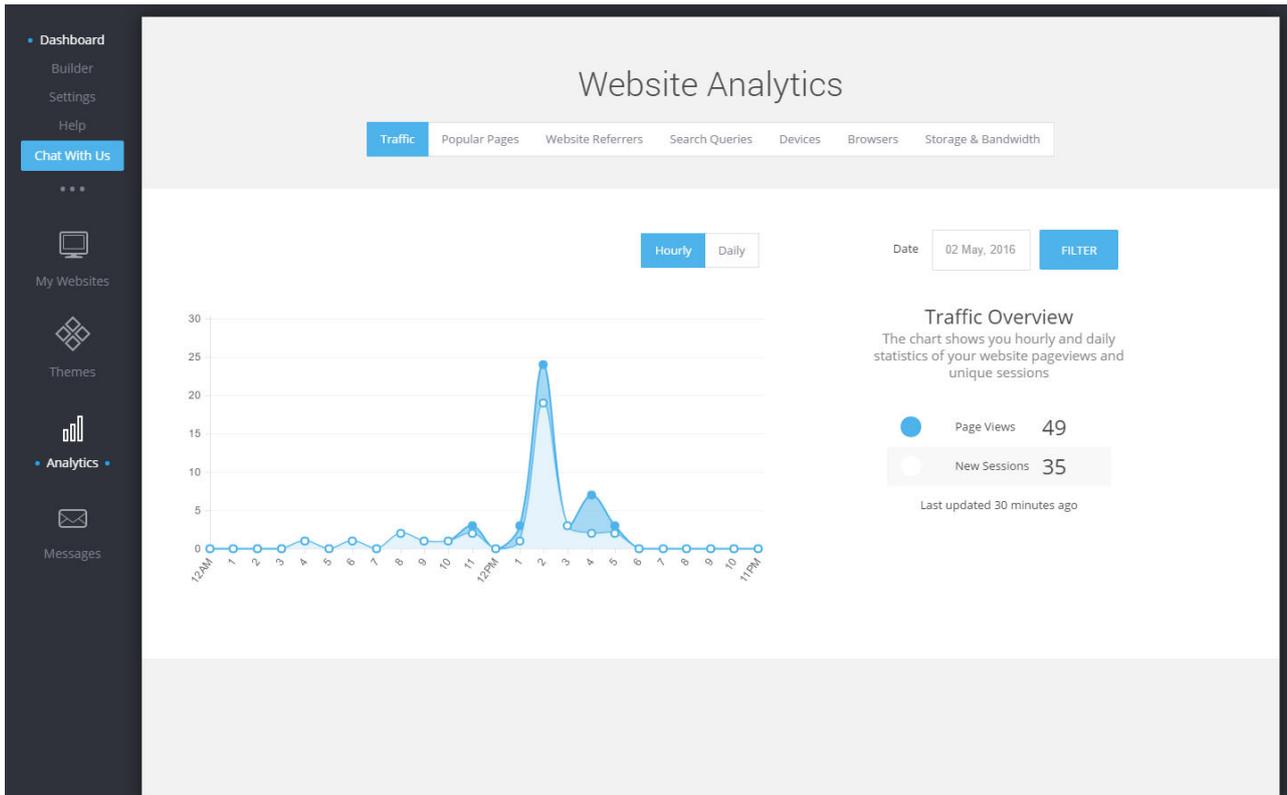

# Blogging

Managing your blog has never been easier. Use the drag and drop builder to add all kinds of elements to your posts and make them as appealing to readers as possible. Create sidebars, add share buttons, enable comments, add tags or categories. All you need, presented in a clean, elegant way.

# Traffic Analytics and Messages

Simvolly offers powerful traffic analytics. Want to know how many visits you had the other day? From what devices? What was the most popular content on your website? Use the analysis to better understand your audience and adapt your content to reach to a bigger audience.

## Pricing

Pricing is very flexible! Our plans start at \$7 and go up to \$26 per month. Often there are promotions running, you can contact us and ask for the current promotions in place. You will start with a 14-day free trial so you have plenty of time to play with the system before going live. You will also get your own custom domain with every yearly subscription.

If your current plan doesn't fit your needs, you can always upgrade or downgrade it and will be charged on a pro-rated basis. We have a no questions asked pro-rated refund on all yearly subscriptions, should you need to cancel your account.

# Something about us

We are a small team from a small country, with great passion and dedication to create something amazing.

Our team is of two:

Ivan - skilled software engineer with expertise in many fields who has been working on large-scale web applications in a variety of environments for the past several years and

Stan - great, passionate designer, aiming for perfection, who redesigned everything several times over the past 2 years to end up with a clean and elegant product.

We are driven to make the web a better place and give every man the opportunity to have his own little web island for the years to come.
